## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Hwang et al (US 2002/0141367).

Regarding claims 1-3, 6, 7, 10-14, 17, and 19-21, Hwang, as shown in figures 7, 22, and 24, teaches a method and apparatus for multiplexing information for uplink transmission comprising channelization operation (2219, 2221) and serial-to-parallel converting into I and Q branches (2215, 2217). See also paragraphs [0131] and [0135].

Regarding claims 4 and 15, Hwang further teaches performing the channelization using OVSF codes. See (2219) and (2221) of figure 22 and (2439), (2419) and (2421) of figure 24.

Regarding claims 5 and 16, Hwang further teaches weighting the spread signals with gain factor. See (2227) and (2229) of figure 22 and (2442) and (2429) of figure 24.

Regarding claims 8, 9 and 18, Hwang further teaches applying the scrambling code. See (2223) and (2225) of figure 22 and (2441) and (2425) of figure 24.

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References Seo (US 2003/0232622), Kim et al (US 2005/0083901), and Yun et al (US 7,085,254) are cited because they are pertinent to the method and apparatus for multiplexing the information having channelization operation.
